Job Description for Google Jobs 2021 :

Google's software engineers develop the next-generation technologies that change how billions of users connect, explore, and interact with information and one another. Our products need to handle information at massive scale, and extend well beyond web search. We're looking for engineers who bring fresh ideas from all areas, including information retrieval, distributed computing, large-scale system design, networking and data storage, security, artificial intelligence, natural language processing, UI design and mobile; the list goes on and is growing every day. As a software engineer, you will work on a specific project critical to Google's needs with opportunities to switch teams and projects as you and our fast-paced business grow and evolve. We need our engineers to be versatile, display leadership qualities and be enthusiastic to take on new problems across the full-stack as we continue to push technology forward.

Responsibilities :

- Research, conceive and develop software applications to extend and improve on Google's product offering.
- Contribute to a wide variety of projects utilizing natural language processing, artificial intelligence, data compression, machine learning and search technologies.
- Collaborate on scalability issues involving access to massive amounts of data and information.
- Solve challenges/problems that you are presented with.

Skills Required For Google Jobs 2021 :
- Experience working with Unix/Linux, Windows or Mac environments, distributed systems, machine learning, information retrieval and TCP/IP.
- Experience programming in C, C++, Java or Python.

Documents to be Carried for Google Jobs 2021 :
- You should carry a copy of the Latest Resume.
- Aadhar Card (original and photocopy) with three passport size photographs are must.
- You need to carry any Government Certified ID Proof like the PAN, Voter ID, Passport.
- Students should have all the essential educational certificates along with the xerox copies.
