

**RAJIV GANDHI UNIVERSITY**  
**DEPARTMENT OF ECONOMICS**  
**COURSE STRUCTURE OF MASTER OF ECONOMICS**  
**(UNDER CREDIT BASED CHOICE SYSTEM)**

**BRIEF OUTLINE**

The Syllabus is as per the guidelines of UGC Regulation on Credit-Based Choice System (CBCS). In the first and second semester all the papers are compulsory, while in the third semester four papers are compulsory and one paper is an open elective course. The students are to opt for one open elective paper which will be offered by other departments. In this syllabus ECO-O- 505 (Basics Issues of Indian Economy) will be offered to the students of other department as an open elective paper. In the fourth semester apart from two compulsory papers, students are to opt for three other elective papers out of the total seven elective papers offered. Each paper carries 100 marks – 20 marks for internal (continuous) evaluation during the semester and 80 marks for external evaluation through end semester examination. Each semester will have 20 credits, comprising five papers of four credits each.

**FIRST SEMESTER**

COURSE CODE	TITLE OF THE PAPER	CREDIT	CONTACT HOURS
ECOC-401	Micro Economic Theory -I	04	40
ECOC-402	Macro Economic Theory	04	40
ECOC-403	Public Economics	04	40
ECOC-404	Mathematics for Economics	04	40
ECOC-405	Growth and Development Economics	04	40

**SECOND SEMESTER**

ECOC-411	Micro Economics II	04	40
ECOC-412	Monetary Economics	04	40
ECOC-413	International Economics	04	40
ECOC-414	Statistics	04	40
ECOC-415	Indian Economy	04	40

**THIRD SEMESTER**

ECOC-501	Environmental Economics	04	40
ECOC-502	Econometrics - I	04	40
ECOC-503	Financial Economics	04	40
ECOC-504	Population Economics	04	40
ECOO-505	Basic Issues of Indian Economy	04	40

**FOURTH SEMESTER**

ECOC-511	Economy of North East India	04	40
ECOC-512	Agricultural Economics	04	40

**Elective Paper (any three)**

ECO-E-513	Development Economics	04	40
ECO-E-514	Econometrics-II	04	40
ECO-E-515	Economics of Infrastructure	04	40
ECO-E-516	Gender and Development Economics	04	40
ECO-E-517	Computer Applications in Economics	04	40
ECO-E-518	Regional Economics	04	40
ECO-E-519	Dissertation Writing	04	40

## **ECO-C-401: MICRO ECONOMIC THEORY - I**

*Objective: The present syllabus has been modified to cater the Micro Economic Theory to an advanced level.*

### **Module I: Consumer's Choice**

Preference ordering and utility function – Utility maximization and Marshallian demand function – Indirect utility function and cost function – Hicksian demand function – Properties of demand function: Engel aggregation, Cournot aggregation, homogeneity – Linear expenditure system.

### **Module II: Theory of Production**

Production function – Returns to scale and returns to a factor - Elasticity of factor substitution - Production function: Homogeneous, Cobb-Douglas, CES and their properties – Derivation of Cobb-Douglas and Leontief production functions from CES production function.

### **Module III: Theory of Firms and Market**

Perfect competition and its critique; Duopoly (Cournot model) – Collusive oligopoly: Cartel and Price Leadership model; Chamberlain's monopolistic competition  
The traditional theory of firm and its evaluation – Baumol's sales revenue maximization model – Limit pricing theory.

### **Module IV: Welfare Economics**

Pareto Optimality: Its conditions - Consumption, production and exchange, critical evaluation of Pareto Optimality – Compensation tests: Kaldor, Hicks and Scitovsky and Little's criterion – Bergson's Social welfare function.

**Recommended Readings:**

1. Koutsoyiannis, A., *Modern Microeconomics*, Macmillan Press, London, 1979.
2. Varian, H., *Microeconomic Analysis*, W.W. Norton, New York, 2000.
3. Baumol, W. J., *Economic Theory and Operations Analysis*, Prentice Halls of India, New Delhi, 1982.
4. Henderson, J.M. and R.E. Quant, *Microeconomic Theory: A Mathematical Approach*, McGraw Hill, New Delhi, 1980.
5. Kreps, M.D., *A Course in Microeconomic Theory*, Prentice Hall of India, New Delhi, 1992.
6. Ray, N.C., *An Introduction to Microeconomic Theory*.
7. Mishan, E.J., *Welfare Economics: An Assessment*, North Holland, Amsterdam, 1969.
8. Sen, Anindya, *Microeconomics, Theory and Applications*, Oxford University Press, 1999.
9. Pindyck, R. S. Rubinfeld, D.L. & Mehta, P.L. *Microeconomics*, Pearson Education

## **ECO-C-402: MACRO ECONOMIC THEORY**

*Objective: The old syllabus did not have some important macro economic topics which have been incorporated in the new syllabus.*

### **Module I: Classical and Keynesian Economics**

Classical theory of income, employment, wage rate, interest and price level, Classical dichotomy, Say's Law, Causes of unemployment – Evaluation of classical model.

Keynesian critique of classical model; Keynesian Theory of income, employment, consumption, interest and multiplier

### **Module II: Neo-Classical and Keynesian Synthesis**

IS-LM model – Relative effectiveness of monetary and fiscal policies – Extension of IS-LM model to an open economy (Mundell-Fleming model).

### **Module III: Theories of Consumption**

Extension of Keynesian consumption function to long run – Relative Income Hypothesis– Life Cycle Hypothesis– Permanent Income Hypothesis.

### **Module IV: Theories of Investment and Business Cycle**

Investment demand: Payback period, Present Value criterion for investment, Internal Rate of Return, Marginal Efficiency of Capital and Investment.

Schumpeterian and Keynesian theories – Multiplier-accelerator interaction (Samuelson)

**Recommended Readings:**

1. Shapiro, Edward, *Macroeconomic Analysis*, Galgatia Publication, New Delhi, 1996.
2. Branson, W. H., *Macroeconomic Theory and Policy*, Universal Book Stall, New Delhi, 1979.
3. Kaldor, N., *Essays on Economic Stability and Growth*, Duckworth, London.
4. Jha, R., *Contemporary Macroeconomic Theory and Policy*, New Age International (P) Ltd., New Delhi, 1999.
5. Mueller, M.G. (ed.), *Readings in Macroeconomics*, Surjeet Publications, Delhi, 1978.
6. Gampinski, J. H., *Macroeconomic Theory*, McGraw Hill, New York, 1982.
7. Keynes, J. M., *General Theory of Employment, Interest and Money*, Macmillan, London, 1936.
8. Frayen R.T., *Macroeconomics: Theories and Policies*, 8<sup>th</sup> Edition, Pearson Education, 2009
9. Blanchard, O (2008): *Macroeconomics*, fourth edition, Pearson Education
10. Mankiw, N. G (1992): *Macroeconomics*, fourth edition, Worth Publishers
11. Gordon, R.J : *Macroeconomics*, twelfth edition, PHI/Eastern Economy edition
12. Parkin,M (1989): *Macroeconomics*, tenth edition, Addison-wesley Publishing Company, New York

## ECO-C-403: PUBLIC ECONOMICS

*Objective: Some new contents of Public Economics have been included.*

### **Module I: Rationale for Government Intervention and public Expenditure**

Role of government in economic activity: Allocation, distribution and stabilization functions (Musgrave's) – Provision of public goods and merit goods – Externalities, market failure and government intervention.

Wagner's law of increasing state activities – Lindhal's model - Samuelson's model – Paradox of voting.

### **Module II: Taxation**

Principles of taxation: Benefit and ability to pay approaches and neutrality in taxation –

Taxable capacity, absolute and relative and its determinants – Deadweight loss of tax and its estimation, elasticity and buoyancy of taxation.

### **Module III: Public Budget and Public Debt**

Incremental budget & zero-base budgeting – deficits in budget: Revenue, Fiscal and Primary -

Public debt: Sources, effects and burden – Ricardian equivalence - Domar's approach to burden of Public debt, management of public debt.

### **Module IV: Fiscal Policy and Fiscal Federalism.**

Compensatory fiscal policy, balanced budget multiplier - Principles of division of financial resources in a federation – Horizontal and vertical imbalance – Finance Commission and Planning Commission in resources transfer from centre to the states in India – Fiscal reforms in India.

**Recommended Readings:**

1. Musgrave, R. A., *The Theory of Public Finance*, McGraw Hill, Kogakhusa, Tokyo, 1959.
2. Musgrave, R. A. and P. B. Musgrave, *Public Finance in Theory and Practice*, McGraw Hills, Kogakhusa, Tokyo.
3. Buchanan, J. M., *The Public Finances*, Richard D Irwin, Homewood, 1970.
4. Jha, R., *Modern Public Economics*, Routledge, London, 1998.
5. Atkinson, A. B. and J. E. Stiglitz, *Lectures on Public Economics*, Tata McGrawHill, NewYork, 1980.
6. Peacock, A. and C. K. Shaw, *The Economic Theory of Fiscal Policy*, George Allen and Unwin, London, 1978.
7. Buchanan, J. M., *Public Principles of Public Debt – A Defence and Restatement*, Richard Irwin, Homewood, 1958.
8. Musgrave, R. A. and C. Shoup (Eds.), *Readings in the Economics of Taxation*, George Allen and Unwin, London, 1970.
9. Chelliah, Raja J. et al, *Trends and Issues in India's Federal Finances*, National Institute of Public Finance and Policy, New Delhi, 1981.

## ECO-C-404: MATHEMATICS FOR ECONOMICS

*Objective: The knowledge of mathematics is useful to the understanding of Economics. The syllabus has been revised to make it more relevant.*

### Module I: Co-ordinate Geometry, Algebra and Matrices

Equation of a straight line and circle, concepts of parabola, hyperbola and ellipse.

Binomial expansion for a positive, negative or fractional exponent – Exponential and logarithmic series.

Scalar and vector - Length of a vector – Addition, subtraction and scalar products of vectors –

Angle between two vectors – Concepts of Vector space, Linear combination and linear dependence.

Types of Matrices - Matrix operations – Determinants - Matrix inversion and solution of simultaneous equations - Cramer's rule – Rank of a matrix – Characteristic roots and vector.

### Module II: Differentiation

Limit and continuity of functions - Basic rules of differentiation – Partial and total

differentiation – Indeterminate form – L' Hospital Rules - Maxima and minima – Points of

inflection – Constrained maximization and minimization – Lagrangean multiplier –

Applications relating to elasticity of demand and supply, equilibrium of consumer and firm,

Difference Equation: first and second order

### Module III: Integration

Integral as anti-derivative – Basic rules of integration – Indefinite and definite integral – Beta

and Gamma functions – Improper integral of the form  $\int_0^{\infty} e^{-x^2}$  - Applications relating to derivation

of total revenue and total cost from marginal revenue and marginal cost, estimation of

consumer surplus and producer surplus – First order differential equation.

## Module IV: Optimization and Linear Programming

Principles of optimization: functions of several variables - Elements of set theory: convexity and concavity - Concept, objectives and uses of linear programming in economics - Graphical method – Slack and surplus variables - Feasible region and basic solution, problem of degeneration - Simplex method – Solution of primal and dual models.

### Recommended Readings:

1. Allen, R.G.D., *Mathematical Analysis for Economists*, Macmillan, 1976.
2. Chiang, A.C., *Fundamental Methods of Mathematical Economics*, McGraw Hill, Kogakusha, New Delhi, 1974.
3. Yamane, T., *Mathematics for Economists*, Prentice Halls, New Delhi, Indian Reprint, 1986.
4. Baumol, W.J., *Economic Theory and Operations Analysis*, Prentice Hall, Indian Reprint 1986.
5. Hadley, G, *Linear Algebra*, Addison-Weley Publishers Company, Tokyo.
6. Vatssa, B.S., *Theory of Matrices*, Wily Eastern Limited, New Delhi, Reprint, 1995.
7. Henderson, J.M. and R.E. Quandt, *Microeconomic Theory: A Mathematical Approach*, McGraw Hill, New Delhi, 1980

## **ECO-C-405: GROWTH AND DEVELOPMENT ECONOMICS**

*Objective: In the old syllabus, planning was a part of Growth Economics. Because of this amalgamation, growth models could not be put into proper focus. In the new syllabus some new ideas on growth models are incorporated.*

### **Module I: Models of Economic Growth**

Recap of Classical growth theories, Harrod & Domar models and unstable growth, Neo-Classical model of Solow, Cambridge models: Joan Robinson & Kaldor – Introduction to Cambridge capital controversy.

### **Module II: Technical Change and Endogenous Growth**

Hicksian and Harrodian versions of neutral technical progress – Labour and capital augmenting technical progress (Harrod and Solow versions only) – Disembodied and embodied technical progress – Exogenous and Endogenous growth models: Romer's Endogenous growth model.

### **Module III: Theories of Underdevelopment**

Economic growth and economic development – measurement of economic development- Problems in measures of development – Human Development Index (HDI) – Obstacles to economic development.

Vicious circles of poverty and its critique, Nelson's low level equilibrium trap, Myrdal's theory of cumulative causation.

### **Module IV: Approaches to Economic Development**

Traditional approach to development: Balanced vs. Unbalanced growth – Rosenstein-Rodan's theory of big push – Nurkse's model – Hirschman's theory – Lewis model – Ranis-Fei model.

### **Recommended Readings:**

1. Sen, A. (Ed), *Growth Economics*, Penguin, Harmondsworth, 1990.
2. Adelman, J., *Theories of Economic Growth and Development*, Stanford University Press, 1961.
- 3.
4. Domar, E.D., *Essays in Theory of Economic Growth*, Oxford University Press, New York.
- 5.
6. Kaldor, N., *Essays on Economic Stability and Growth*, Duckworth, London, 1980.
7. Solow, R. M., *Growth Theory: An Exposition*, Oxford University Press, 2000. .
8. Thirwal, A.P., *Growth and Development*, Macmillan, London, 1999.
9. Meier, G, *Leading Issues in Economic Development*, Oxford University Press, New Delhi, 1990.
10. Higgins, B., *Economic Development*, W.W. Norton, New York, 1959.
11. Todaro, M.P., *Economic Development*, Longman, London, 1996.
12. Myrdal, G., *Economic Theory and Underdeveloped Regions*, Duckworth, London, 1957.
13. Ray, D., *Development Economics*, Oxford University Press.
14. UNDP, *Human Development Reports*, Oxford University Press.

## **ECO-C-411: MICRO ECONOMIC THEORY – II**

*Objective: The main objective of the paper is to acquaint the students with advanced concepts of Micro Economic Theory.*

### **Module I: Choice under Uncertainty and Risk**

Choice under uncertainty and risk - **Neumann-Morgenstern utility index**, classes of measures – Axioms, expected pay off and expected utility - Prediction from Neumann-Morgenstern utility index – **Relationship between the shape of the utility function and behaviour towards risk** - **Elasticity of marginal utility and risk aversion, absolute and relative risk aversion.**

### **Module II: Game Theory and Imperfect Information**

Concept – **Two-person zero-sum** and constraint-sum game – **Pure strategy, maximin and minimax** – **Concept of equilibrium: Saddle point, mixed strategy and minimax theorem** – **Two person co-operative game, non-co-operative game** – **Dominated strategy** – **Nash equilibrium** – **Prisoner's dilemma and its repetition** – **Nash equilibrium in oligopoly.**  
**Asymmetric information, adverse selection, moral hazard and Signalling** – **Applications to insurance and lemons markets.**

### **Module III: Theory of Cost and Factor Pricing**

**Derivation of cost function from production function** - **Technical progress (Hicksian and Harrodian version)** and factor shares – **Theories of distribution: Marginal productivity theory and Euler's theorem, Ricardo, Kalecki and Kaldor.**

### **Module IV: Theory of General Equilibrium**

Brouwer's fixed point theorem - **Principles of general equilibrium, existence, uniqueness and stability (Walrasian and Marshallian conditions of stability)** – **Walrasian general equilibrium system** – **Non-Walrasian equilibrium.**

### **Recommended Readings:**

1. Maddala, G.S. and Ellen Miller, *Microeconomics---Theory and Applications*, Tata McGraw-Hill Publishing Company Limited, New Delhi, 2004.
2. Koutsoyiannis, A., *Modern Microeconomics*, Macmillan Press, London, 1979.
3. Varian, H., *Microeconomic Analysis*, W.W. Norton, New York, 2000.
4. Baumol, W. J., *Economic Theory and Operations Analysis*, Prentice Halls of India, New Delhi, 1982.
5. Henderson, J.M. and R.E. Quant, *Microeconomic Theory: A Mathematical Approach*, McGraw Hill, New Delhi, 1980.
6. Kreps, M.D., *A Course in Microeconomic Theory*, Prentice Hall of India, New Delhi, 1992.
7. Ray, N.C., *An Introduction to Microeconomic Theory*.
8. Borch, K.H., *The Economics of Uncertainty*, Princeton University Press, Princeton, 1968.
9. Diamond and Rothschild (Eds.), *Uncertainty in Economics*, Academic Press, New York, 1978.
10. Ryan and Pearce, *Price Theory*, Macmillan.
11. Hirslief, *Applications of Microeconomics*.

## **ECO-C-412: MONETARY ECONOMICS**

*Objective: In view of growing importance of Money market a paper on monetary economics has been introduced.*

## **Module I: Concept of Money**

Theoretical and empirical definition of money-simple sum vs. weighted monetary aggregates-Barnet's approach to monetary aggregation-Divisia monetary aggregates. RBI's approach to monetary aggregates.

## **Module II: Demand and Supply of Money**

The demand for money – Tobin's portfolio selection and Baumol's transaction demand for money - Friedman's restatement of quantity theory of money – Laidler's buffer stock approach- Supply of money – Inside and outside money, Gurley-Shaw's approach – Behavioural approach of money supply-Concept of exogenous money supply, Friedman's theory – Endogenous money supply, Kaldor's theory.

## **Module III: Monetarism and New-Classical Macroeconomics**

Phillips Curve – Monetarism: Basic elements of monetarism – Monetarists proposition.

Rational expectations: New-classical tenets-instant adjustment of market-real business cycle theory-Rational expectation and Macroeconomic model-Lucas critique.

## **Module IV: Inflation and Monetary Policy**

Various theories of inflation-Monetarist view on inflation-Concept of core inflation-measures of inflation (CPI, WPI, Core, Headline, GDP deflator).Monetary targeting-Inflation targeting-Interest rate targeting-p-star model.

Rule vs. discretion in the conduct of monetary policy-monetary policy measures and central bank-measures of monetary control.

## **Recommended Readings:**

1. Chandler, L. V. and S. M. Goldfeld, *The Economics of Money and Banking*, Harper & Row, New York, 1977.
2. Bhole, L. M., *Financial Institutions and Markets*, Tata McGraw Hill Company Ltd., New Delhi, 1999.
3. Gupta, S B, *Monetary Economics Institutions and policy*, S.Chand& Co., New Dehi, 1995.
4. Branson, W H, *Macroeconomic Theory and Policy*, Universal Book Stall, New Delhi, 1979.
5. Patinkin, *Money, Interest and Prices*, Harper and Row, New York
6. Khan M. Y., *Indian Financial System*, Tata McGraw Hill, New Delhi, 1996.
7. Coghlan, R., *The Theory of Money and Finance*, Macmillan, London, 1980
8. Frisher, H, *Theories of Inflation*, Cambridge University Press, 1983.
9. Sheffrin, S.M., *Rational Expectation*, Cambridge University Press, 1996.
10. Higgins, *Monetary Economics*.

## **ECO-C-413: INTERNATIONAL ECONOMICS**

*Objective: In the age of globalization, International Economics is very important. The contents of the earlier paper have been expanded.*

## **Module I: Theory of International Trade**

Review of theory of comparative advantage – Modified Ricardian model: Haberler's opportunity cost theory – Trade under increasing, decreasing and constant cost conditions - Heckscher-Ohlin theory – Factor price equalization theorem – Leontief Paradox and its critical evaluation (Meade's view) – Trade under imperfect competition: Trade based on product differentiation, Intra-industry trade, Technological Gap and Product Life Cycle, Transportation cost, Environment cost standard and international trade, Location Theory

## **Module II: Terms of Trade and Tariff**

Offer curves, elasticity and terms of trade - Impact of tariff: Partial and general equilibrium analysis – Game theoretic approach to tariff - Tariff and income distribution: Stolper-Samuelson theorem – Hypothesis of secular deterioration in terms of trade and its empirical testing – Terms of trade and economic growth.

## **Module III: Trade and Technological Change**

Increase in factor endowments and international trade, the Rybczynski theorem –Bhagwati's views on immiserizing growth - Technical change and international trade: Neutral, capital saving and labour saving technical progress and their impact on terms of trade.

## **Module IV: Balance of Payments and Foreign Exchange Market**

Components of balance of payments – Relative importance of current account and capital account – Balance of payments adjustment: Absorption and monetary approaches (Harry Johnson) – Foreign trade multiplier.

Foreign exchange market - Exchange rate determination: Purchasing power parity theory – Interest parity theorem, Dornbusch's theory of Overshooting, Rodriguez-Calvo currency substitution model, Mundel-Flemming model - International debt repayment problem.

### Recommended Readings:

1. Mannur, H.G, *International Economics*, Vikash Publishing House, 1983.
2. Kindleberger, C.P. *International Economics*, R.D. Irwin, Homewood, 1991.
3. Soderston, Bo, *International Economics*, The Macmillan Press Ltd., London, 1991
4. Salvator, D, *International Economics*, Prentice Hall, Upper Saddle River, N.J. NewYork, 1997.
5. Bhagwati, J. (Ed.), *International Trade: Selected Readings*, Cambridge University Press, Massachusetts, 1981
6. Viner, Jacob, *Studies in the Theory of International Trade*, Harper and Row, New York
7. Grable, J.O., *International Financial Markets*, Prentice Hall, New York, 1996.
8. Meade, J.E, *Theory of International Economic Policy*, Oxford University Press, London, 1968.
9. Meier, G.M., *The International Economics of Development*, Harper and Row, New York, 1968.
10. Cherunilam, Francis, *International Economics*, Tata McGraw-Hill Publishing Company Limited, New Delhi, 1999.

## ECO-C-414: STATISTICS

*Objective: The old syllabus has been revised to include a few new topics in Statistics and exclude one unit on Econometrics since a new paper on Basic Econometrics is included in the Third Semester.*

### Module I: Probability and Random Variable

The concept of a sample space & elementary events – Mutually exclusive events, dependent & independent events, compound events – a priori & empirical definition – Addition & multiplication theorems – Compound and conditional probability – Bayes theorem.

Random variable, probability function and probability density function – Expectation, variance, covariance, variance of a linear combination of variables, moments & moment generating functions

## Module II: Probability Distribution

Binomial, Poisson, Beta, Gamma, Normal distributions, standard normal (z) distribution and Derivation of moments and moments generating functions.

## Module III: Correlation & Regression, Index Number and Time Series

Relationship between two variables – Karl Pearson's and Spearman's correlation coefficient and Regression – estimation of two regression lines – Angle between two regression lines – Properties of regression coefficients – standard error of regression coefficients – Partial and multiple correlation and regression (concept).

Index Number – Laspeyeres, Paasche's and Fisher's index number – Tests for ideal index number – Base shifting, base splicing and deflating – Concept of constant utility index number.

Time series – Components of time series – Methods of estimation of linear and non-linear trend.

## Module IV: Statistical Inference

Properties of an ideal estimator - Concept of sampling distribution –  $\chi^2$  (Chi-Square), t and F distributions and their properties - Type I and type II errors, One tailed and two tailed tests – Testing of hypothesis based on Z, t and F distributions – Properties of an ideal estimator: unbiasedness, efficiency and consistency.

**Recommended Readings:**

1. Nagar, A.L. and R. K. Das, *Basic Statistics*, Oxford University Press, New Delhi, 1993.
2. Gupta, S. C., *Fundamentals of Applied Statistics*, S.Chand and Sons, New Delhi, 1993.
3. Goon, A M., M.K.Gupta and B.S. Dasgupta, *Fundamentals of Statistics*, Vol. I and Vol.II, The World Press Limited, Calcutta, 1996.
4. Kapoor, J.N. and H.C. Saxena, *Mathematical Statistics*, S.Chand & Company, New Delhi, 1992.
5. Millar, J., *Statistics for Advanced Level*, Cambridge University Press, Cambridge, 1996.
6. Hogg, R.V. and A.T.Craig, *Introduction to Mathematical Statistics*, Macmillan Publishing Co., New York, 1970.
7. Gupta, S.C. and V.K. Kapoor, *Fundamentals of Applied Statistics*, S. Chand and Sons, New Delhi, 1993.
8. Gupta, S.C. and V.K. Kapoor, *Fundamentals of mathematical Statistics*, S. Chand and Sons, New Delhi.

**ECO-C-415: INDIAN ECONOMY**

*Objective: India economy has undergone a great change in so far as the basic mode of its operational techniques is concerned. Among other things, it has called for change in the syllabus to keep pace with emerging realities.*

**Module I: National Income, Employment and Price Behaviour**

National income – Trends in growth and structure, performance of different sectors. Employment and unemployment: Recent trends and estimates – Changing structure and emerging issues – Labour market reforms - Inflation: Recent trends in prices in India and its causes, price stability.

## **Module II: Agriculture and Industry**

Agricultural performance: Growth and productivity - Economic reforms and their impact on agriculture – Agricultural policy — Institutional reforms.

Evolution of Indian industries: An overview – Evaluation of industrial policies of 1948 and 1956 – PSUs: Performance and shortcomings – PSUs and disinvestment debate - Economic reforms and industry.

## **Module III: Infrastructure**

Physical infrastructure: Power, transport and communication – Financial infrastructure: Bank – Social infrastructure: Education and healthcare – Institutional infrastructure: Market - Financing infrastructure: Problems and policies.

## **Module IV: Public Finance and Economic Reforms**

Trends in revenue and expenditure of central & state governments – Public debt – Characteristics of tax reforms in India – Deficit financing and price behaviour in India: Consequences and policy suggestions

Rationale for economic reforms – Main components of reforms – Evaluation of reforms – Impact of WTO on Indian economy – Foreign capital and MNCs in India.

14. Government of India *Economic Surveys* Various years, New Delhi

## **ECO-C-501: ENVIRONMENTAL ECONOMICS**

*Objective: The syllabus is used to deal with problems of valuation of environmental goods and designing of instruments and institutions for the management of environment.*

## **Module I: The Economy and the Environment**

**Interlinkages between the economy and the environment** – Sources and Causes of environmental degradation - **Externality and market efficiency–Common Property Resources- Open Access and Tragedy of commons**, Relationship between resource stock and growth.

## **Module II: Environmental Valuation**

Basic concepts of valuation method, **Measurements of environmental values - use value**, option value and **non - use value**, Valuation methods- **Contingent valuation method, Travel cost method and Hedonic pricing method.**

## **Module III: Environmental Regulations and Policies**

Institutional alternatives – Command and control, Economic Instruments - Pigouvian taxes and subsidies - Market based-instruments- Mixed instruments - Coase's bargaining solution and collective action- Macroeconomic policies and the environment.

## **Module IV: Environment and Development**

**Environment - development trade-off - Population, poverty and environment - Kuznets curve - Trade and environment - Concept and indicators of sustainable development – Rules to sustainability, Measurements of sustainable development – Pearce-Atkinson measure – Concept of Green Accounting.**

### **Recommended Readings:**

## **ECO-C-502: ECONOMETRICS-I**

*Objective: The econometric theory has become a very powerful tool for understanding of applied economic relationships and meaningful research in economics. This paper is introduced to equip the students with basic theory of Econometrics and relevant applications of the methods.*

## **Module I: Linear Regression Model**

Properties of good estimators in small and large samples - Ordinary Least Square (OLS), 2-variable model, assumptions and properties of OLS estimators (BLUE) – Unbiased estimator of the variance of the error term – Confidence interval and significance - Extension of two variable model, logarithmic and reciprocal transformation.

## **Module II: General Linear Model**

Assumption of OLS and estimation – Correlation matrix, properties of estimators: Their variance and testing their significance and confidence intervals.

## **Module III: Autocorrelation and Heteroscedasticity**

Autocorrelation: Meaning and types (positive and negative) – Effects of autocorrelation on the properties of OLS estimators – Detection of autocorrelation: Durbin-Watson test and von-Neumann ratio.

Heteroscedasticity: Meaning and effects on the properties of the OLS estimators – Detection: Glaser method.

## **Module IV: Multicollinearity and Errors in Variables**

Multicollinearity: Meaning, its effects on the estimation of parameters and their variances.

Errors in variables: Meaning (errors in equation and in variables) – Effects of errors in variables when errors occur in (a) dependent variable, (b) independent variable, and (c) both dependent and independent variables.

## **ECO-C-503: FINANCIAL ECONOMICS**

*Objective: In view of growing importance of financial market and financial institutions in the process of development, financial economics is included as a full paper.*

### **Module 1: Capital and Finance**

Corporate entity – sole proprietorship, partnership, joint stock company, limited liability, separation of ownership from control, conflicts of interests between shareholders and managers. Sources of finance-equity and loan, different types of shares, ordinary, preference; debentures and loans.

## **Module II: Cost of Capital**

Business Risk and Financial Risk, Cost of loan and equity traditional view on loan finance, advantages and disadvantages of loan finance, Modigliani and Miller view of gearing (leverage) critical appraisal of Modigliani and Miller view.

## **Module III: Risk and Return**

Measurement of Risks, Portfolio risk, probability distribution of returns, systematic and unsystematic risk, diversification; risk and return in a portfolio, utility theory, attitudes towards risk and expected value of return, Arrow- Pratt's measures of Absolute and Relative Risk Aversions.

## **Module IV: Portfolio Theory and Pricing of Capital Assets**

Optimal portfolio select, efficient frontier, lending and borrowing, capital asset pricing model (CAPM) assumptions, and derivation of CAPM, empirical tests. Arbitrage pricing model.

## **ECO-C-504: POPULATION ECONOMICS**

*Objective: The objective of the paper is to acquaint the students to the components of population, its measurement and its economic implications. Some minor modifications have been done in the earlier paper in order to make it more up to date.*

## **Module I: Population Growth and Fertility**

Trends of population growth since the beginning of 20<sup>th</sup> century; basic measures of demography: rates and ratios; data sources: census, surveys and vital statistics. Measures of fertility: CBR, GFR, TFR, cumulative fertility rate, child women ratio, gross and net reproduction rates; determinants of fertility: Malthusian view and its shortcomings; social mobility and fertility: Dumont's social capillarity theory; economic models: Easterlin's and Becker's theories of fertility and their critical evaluation, trend of fertility in India.

## **Module II: Mortality**

Basic measures: CDR, age specific death rate ; early neonatal, neonatal , infant mortality rates , perinatal mortality and maternal mortality rates ; Life table, complete and abridged, and their construction ; trends of mortality in developed and developing countries ; determinants of mortality; causes of high mortality in LDCs with special reference to India; trend of Indian mortality measures taken to improve health status.

## **Module III: Migration and Urbanization**

Measures of migration, internal and international migration: theories of migration: push and pull factors, Lee's and Harris Tadaro models.

Urbanization: its measures and determinants; factors propelling urbanization in developed countries; urbanization in developing countries: its patterns and factors promoting urbanization in the developing countries with special reference to India; problems of urbanization in developing countries.

## **Module IV: Population Policy**

Arithmetic, geometric and exponential growth rates of population; relation between growth rate and doubling time of population, age distribution (age pyramid), young and old age dependency ratios and their determinants; dependency ratio and savings, physical and human

capital formation; population estimates and projections: mathematical and demographic methods; measures of labour force; factors determining labour force participation rate.

Indian population policy, family planning and family welfare programme in India, its evaluation, National Population Policy 2000; Manpower planning in India.

## **ECO-O-505: BASIC ISSUES OF INDIAN ECONOMY**

*Objective: The objective of the paper is to acquaint the students to the basic components of the Indian economy.*

## **Module I: Concept of National Income and Issues of Indian Economy**

GDP, GNP, NNP, Per Capita Income, measurement of National Income, Sustainable development and Green GNP, HDI.

Planning – Objectives and achievements, growth of national Income, population, poverty, unemployment and inflation, rural development programmes – MGNREGA, PMGSY and Indira Awas Yojna - evaluation.

## **Module II: Indian Agriculture**

Importance of agriculture, trends in agricultural production and productivity, Green revolution and its impact, land reforms, PDS and food security, National Agricultural policy, APCI, Remunerative prices, Farm subsidies, Water resources.

## **Module III: Public Finance**

Sources of public revenue and types of expenditure; problems in mobilization of Revenue, Revenue deficit and Fiscal deficit; causes of persistent deficits Trends in revenue and expenditure of Government of India, Finance Commission of India, NITI Ayog, Centre-State financial relations.

## **Module IV: Economic Reforms in India and Balance of Payment**

Concept of globalisation, Rationale for economic reforms, Banking and Financial sector reforms (Narasimham Committee Recommendations), Impact of reforms on economic growth, trend and growth of FDI in India, India's balance of payments position, WTO and India.

## **Recommended Readings:**

## **ECO-C-511: THE ECONOMY OF NORTH EAST INDIA**

*Objective: The present syllabus has been modified to cater to the need of an updated syllabus for the students of North East economy in a crystal fashion.*

### **Module I: Structure of North East Economy**

North East economy: An overview – Basic Features of North East economy - Relative performance of the North East economy in the country - Economic performance of the region – Level and growth of NSDP and Per Capita NSDP – Changing sectoral composition of state income and sectoral contribution to the growth of income with respect to Arunachal economy - Natural Resource Base – Land, mineral, water and forests – Status of human development in N.E. India.

## **Module II: Population**

Population: Trends and features, causes for its rapid growth, population growth and economic development - Urbanization: Trends and features, causes for rapid growth and consequences - Work force structure and its changes, participation of female labour force, unemployment situation in North East India.

## **Module III: Agriculture and Industries**

Agricultural practices in the region – Permanent cultivation, shifting cultivation and its effects – Jhum cultivation and the problem of induction of new technology - Land tenure and problems of agricultural credit - Land use pattern and cropping pattern in North East India and Arunachal Pradesh - Agricultural productivity – Causes of low productivity - Status of industry in North East - Factors inhibiting the growth of industries.

## **Module IV: Infrastructure, Fiscal and Developmental Issues**

Infrastructure development: Power, transport, communication, market and banking: NEDFi, SIDBI, IDBI – State of public finance and fiscal issues in North Eastern economy with special reference to Arunachal Pradesh – Opportunities and Challenges of North East economy in the

background of economic liberalization of India – Opening of NE economy and ‘Look East’ policy of the government of India.

## ECO-C-512: AGRICULTURAL ECONOMICS

*Objective: This paper has been designed to provide theoretical and analytical knowledge of Agricultural Economics to the students and also to provide them insight into the issues of Indian agriculture in the changed global scenario.*

## **Module I: Introduction to Agricultural Economics and Farm Management**

Nature of Agricultural economics - Interdependence and complementarities between agriculture and industry - Farm efficiency measures - Farm mechanization.

Nature of agricultural production function: Spillmans, Cobb-Douglas type, price expectation and Cob web theorem - Nerlove's model - Marketed and marketable surplus - Mathur-Eizkel hypothesis.

## **Module II: Theories of Agricultural Development**

Problems of labour surplus economy: Lewis' model and Jorgenson's models – Theories of agricultural development: Schultz and Mellor - Farm household models: Chayanov, Barnum-Squire and Low's models – Share tenancy: Marshall and Cheung models.

## **Module III: Agricultural Finance and Marketing**

Rural credit market: Lenders' risk hypothesis, monopolistic credit market –Sources of agricultural finance: Cooperative credit society, Commercial banks, Regional rural banks and NABARD –Microfinance - Rural credit policy.

Agricultural marketing in India – Cooperative marketing – Government measures to improve the system of agricultural marketing.

## **Module IV: Issues in Agricultural Development in India**

New technology and its impact on output, employment and income distribution, Problems of diffusion of new technology - Food security and PDS – Agricultural subsidies and price policy – Public investment in agriculture – National agriculture policy - WTO and Indian agriculture: Agreement of Agriculture (AoA), Sanitary and Phyto-sanitary measures and their implications.

## **ECO-E- 513: DEVELOPMENT ECONOMICS**

*Objective: In this paper, planning is included in Development Economics to make it more relevant. The new concepts like 'community approach to development' and 'trade and political economy of development' are also incorporated*

## **Module I: Sectoral aspects of Development:**

Role of Agriculture in Economic Development; Barriers to Agriculture; Agricultural Transformation: Designing an Agricultural Strategy; Rationale and Pattern of Industrialization in developing countries; its relation to agricultural modernization, Choice of Techniques, appropriate technology and employment; Terms of Trade between Agriculture and Industry.

## **Module II: Economic Development and Institutions**

Market efficiency and Market Failure; Role of State in Economic Development: State Capacity and State Failure; The Washington Consensus : its critique, Issues of Good Governance; Community approach to development: State, market and community – Market and prisoners’ dilemma – Community, social capital and development – Critical evaluation of the social capital approach to development.

## **Module III: Development Planning**

Rationale for planning in a developing economy – Input-output model closed and open; Samuelson’s substitution theorem, Hawkins-Simons condition and sectoral projections – Plan models in India: Mahalanobis model – Plan in a market oriented economy.

## **Module IV: Trade and Political Economy of Development**

Import substitution and export-led growth – Krueger’s model of rent seeking society – Institutions and development: Contribution of Stephen Knack and Philip Keefer – Foreign direct investment, foreign institutional investment and economic development – Foreign aid and economic development

## **Recommended Readings:**

## **ECO-E-514 ECONOMETRICS-II**

*Objective: The course covers various advanced econometric methods applicable to different topics in economics and those needed for applied economic research.*

### **Module I: Alternative Methods of Estimation**

Aitken's Generalised least squares (GLS), method of estimation, properties of GLS estimation. Feasible estimator, GLS with general linear restrictions, a priori information

## **Module II: Limited Dependent Variables Cases**

Qualitative Choice variables, Linear probability model: LOGIT, PROBIT and TOBIT.

## **Module- III: Simultaneous Equation Models**

Simultaneous equations system, two-way linkage – OLS estimation and simultaneous equation bias - Structural form and reduced form – Identification, rules of identification, rank and order conditions; seemingly uncorrelated Regression equation (SUR model), Recursive system

## **Module IV: Estimation of Simultaneous Equation Model**

Just identified model: Indirect least squares (ILS) method, consistency of ILS estimators.

Overidentified model: Failure of ILS estimation (ILS estimators not unique) - 2SLS estimation, consistency of 2SLS estimators – Matrix presentation of 2SLS estimators.

Application of GLS on structural equation, K-Class estimator.

## **ECO-E-515: ECONOMICS OF INFRASTRUCTURE**

*Objective: The important role infrastructure plays in a country's and region's development need not be reiterated. The paper exposes the students wholly to issues involved in development of infrastructure in developing countries.*

### **Module I: Introduction**

Infrastructure and economic development – Infrastructure as a public good – Social and physical infrastructure – Special characteristics of public utilities – Economies of scale of joint supply – Marginal cost pricing vs. other methods of pricing of public utilities – Cross subsidization: Free prices, equity and efficiency.

## **Module II: Transport Economics and Communication**

The structure of transport costs and location of economic activities – Demand for transport – Model of freight and passenger demand - Cost functions in the transport sector – Principle of pricing – Special problem of individual models of transport.

Rate making in telephone utilities – Principles of decreasing costs in telephone industry- Characteristics of postal services – Criteria for fixation of postal rates – Measurement of standards of service in telephone and postal utilities.

## **Module III: Energy Economics**

Primacy of energy in the process of economic development – Factors determining demand for energy – Energy conservation – Renewable and non-conventional sources of energy – Energy modeling.

## **Module IV: Social Infrastructure, Health and Education**

Organization and financing of supply of social services – Private vs. public sector financing – Debate about fixation of prices of social services.

Education and economic growth – Approaches to educational planning: Rate of return and manpower balance approaches – The issues in education policy.

Health dimensions of development – Determinants of health: Poverty, malnutrition, illiteracy and lack of information – Economic dimension of health care: Demand and supply of health care – Financing of health care and resource constraint.

## **ECO-E-516: GENDER AND DEVELOPMENT ECONOMICS**

*Objective: The objective of the paper is to provide an analysis of gender issues in the process of development and to highlight its centrality in the entire process. The course covers the basic theories on the relation between gender stratification and development. The stress is put to familiarize the students with the rich empirical literature on various dimensions of gender and development issues especially in South Asian and Indian context.*

## **Module I: Gender and Economics: Introduction**

Gender and feminisms - Economic methodology and feminist critiques - Development: Meaning and concept - Human development and gender - Construction of Human Development Index and Gender-related Development Index and criticisms.

## **Module II: Work and Employment**

Types of work, work participation rates, labour force participation rate - Female labour supply: Neo-classical theory - Models of allocation of time: Becker and Mincer - Segregation in labour market: Discrimination in work place, measures of discrimination, Differential employment - Household work and non-market work: Time Use Survey

## **Module III: Agriculture, Environment, Health and Well-Being**

Gender and property rights: Theories, experiences in South Asia, India and Arunachal Pradesh - Boserup's thesis on gender and agricultural change and its criticisms - Technological change and female labour - The impact of Green Revolution - Gender, environment and development: Linkages - Gender issues in natural resource management

Sex ratio, child sex ratio, son preference, differential mortality between sexes - Differential access to health care - Intrafamily distribution of food and nutrition - Women's autonomy, fertility and health status - Health and poverty.

## **Module IV: Gender and Globalisation**

Women under capitalism: Review of political economy approaches - Structural adjustment and women - Gender, informalisation and flexible production - Review of gender and development policies: Role of international bodies, governments and civil society institutions - Mainstreaming gender concerns: Methods and approaches.

## **ECO-E-517: COMPUTER APPLICATIONS IN ECONOMICS**

*Objective: Economics, being an empirical science, computers have emerged as pivotal instruments of economic analysis, research and forecasting. Therefore, the future economists must be equipped with skills and tools based on computers, which the course will provide to them.*

## **Module I: Introduction to Computer System and Data Processing**

Operating system – Input-output - Computer networking and resource sharing, hardware, software and firmware, examples and techniques in programming languages like C, C++, visual basic and java.

Concept of data, record and file – Types of data and data structures, data analysis - Data storage and retrieval – Database: concepts and operation on database.

## **Module II: Statistical Processing Techniques and Methods**

Series, groups, tables, graphs and objects – Time and frequency series – Regression methods and techniques – Regression analysis.

## **Module III: IT Application to Finance**

On line banking – Electronic trading – Data sharing and decimation – Electronic transaction - Document delivery – Authentication and validation transaction processing.

## **Module IV: IT Application to Commerce**

Electronic trading and marketing – On line shopping and malls - Document and transaction security and digital signature.

### **Recommended Readings:**

1. Rajaraman, V., *Fundamentals of Computer*, Prentice Hall of India, New Delhi, 1996.

## **ECO-E-518: REGIONAL ECONOMICS**

*Objective: The basic objective of the course is to provide an overview of the scope and method of regional economics to the students. The significance of the spatial aspects of development*

*process is being increasingly realized in a globalised world. The purpose of the paper is to equip the students with the basic tools of regional analysis.*

### **Module I: Introduction to Regional Economics and Economic Analysis**

Regional economics: Definition and scope - Defining a region - Delimiting functional regions - Relations of activities within a region- Forward and backward linkages - Regional specialization.

Price determination in regional setting - Market area analysis - Spatial variation in costs - Regional income and employment determination - Regional income multiplier.

### **Module II: Theories of Firm Location: Agglomeration Economies**

Objectives of location choice - Location factors - Location and the theory of production - Determinants of agglomeration - Location measures: Location quotient, coefficient of localization, localization curve.

### **Module III: Regional Input-Output Analysis**

Input-output analysis: Introduction - Input-output analysis in a single region - Input-output analysis in a two or more regions: The inter-regional input-output (IRIO) model - Input-output analysis in a two or more regions: The multi-regional input-output (MRIO) system.

### **Module IV: Regional Growth and Development**

Causes of regional growth - Interregional trade and factor movements - Interregional convergence and divergence - Measurement of spatial disparity: Principal components analysis - Central place theory; Growth pole theory; theory of cumulative causation; Dependency theory: Centre-periphery and world systems theories.

## **ECO-E-519 DISSERTATION WRITING**

*Objective: the paper is being introduced in order to inculcate Research Aptitude among the Masters students.*

**MODULE:** Dissertation writing will be based on Primary and / or Secondary Data.
