INTRODUCTION

Getting published in a quality journal is considered a great accomplishment by the academicians. Research has significant importance in all the streams and provides significant wisdom for the welfare of mankind. Therefore, teachers/researchers are aspiring to publish in high impact factor journals. Moreover, publishing quality papers are need of hour to meet the challenges imposed by the global changes also due to the need of multidisciplinary and multi dimensional domain of research. However, under the current circumstances to exemplify in professional and personal balance the ethical requirements, conducting quality research and publishing quality papers need to be focused. The importance of quality information has increased manifold with the implementation of National Education Policy. Thereby, quality publications are necessary prerequisite to achieve success in the academic profession.

A good record of publications in topnotch journals not only guarantees personal satisfaction but also open doors to well established portals of academic learning along with strengthening the academic pursuits besides recognition and fame. However, despite growing concern by universities and teachers to get more research publications, a very few academicians understand and appreciate the mechanism of quality researches. Hence, the research paradigm ranging from proper research design, appropriate methodology and appropriate format for developing a research paper etc need to be reenergized in order to meet the requirements of high quality and international journals. The Capacity Building Programme (CBP) is aiming to instill the search aptitude in every academic pursuit. Keeping in view of the importance of quality papers, which not only support the academicians per se rather improve the ranking of Indian Universities, a CBP in these aspects is envisaged with a great focus on budding and young researchers through online platform.
